1. Completed Intermediate from Vip Inter College.

SKILLS

Languages:

1. PHP
2. Laravel
3. MySql
4. Html , Css , Javascript , JQuery

Tools:

1. VScode
2. Git , AWS
3. Bitbucket , Github , Gitlab
4. Supabase
5. Trello,
6. Docker

Core Competencies:

1. Software development life cycle
2. Restful APIs
3. Third Party APIs integration
4. Servers
5. Debugging

INTEREST

1. **Personal Learning Projects:**
Enjoy coding projects for hands-on learning and exploring new programming concepts.
2. **Technology Exploration:**
Passionate about experimenting with technologies to expand my skill set.

PROJECTS

AI Image generator — *Generates images on the basis of prompts*

As part of my recent project, I developed an AI chatbot designed to enable users to generate images based on prompts. Users can input prompts to generate images tailored to their requirements. The chatbot understands the context of the prompt to generate accurate and high quality Images.

Technologies Used - Html, Css, JS, Php , OpenAI's API, Stripe

AI Study Buddy — *AI-Powered Learning Web App*

I developed a web application to help students from Classes 3 to 12 enhance their learning and exam preparation. The platform features an AI chat assistant for instant question support, AI and manual quiz generation, flashcard creation, and practice tools to reinforce knowledge through interactive activities. The goal is to make learning engaging, accessible, and effective.

Link: <https://ai-study-buddyv.netlify.app/>

Technologies Used - React JS (Vite), Gemini AI API, Supabase

HealthWealth — *Doctor Patient Management Platform*

In my project focused on bridging the gap between doctors and patients, I developed a comprehensive doctor-patient management system that streamlines the process of booking appointments and facilitates seamless communication between users. Patients can find any doctor anytime according to their need. The system comprises three user **roles**:

1. Admin 2. Doctors 3. Patients

Functionalities:

1. Appointment Booking
2. Chat Messaging
3. Video Call

Technologies Used - Laravel ,Html, Css, JS, Websockets , Webhooks , Stripe

Manasprint — *UPSC Exam Preparation App*

As part of this project, I developed a secure, fast, and reliable backend using Laravel for a mobile app aimed at UPSC aspirants. The app allows users to purchase study plans for individual subjects and practice through previous year MCQ tests, custom tests, static quizzes, and flashcards. It also includes a badge system for tracking progress. RevenueCat was integrated for payment handling with real-time updates via webhooks.

Technologies Used - Laravel, HTML, CSS, JS, RevenueCat, Webhooks

LANGUAGES

1. Hindi
2. English
