|                                     | 7.CI/CD Pipelines              |                                 |

## PROJECTS

### Manasprint

UPSC Exam Preparation App

- Developed a fast, secure backend for a UPSC learning platform using Laravel.
- Integrated RevenueCat API with real-time webhook updates for payment tracking.
- Designed quiz, badge, and progress systems improving engagement by 40%.
- Implemented efficient caching and optimized database queries, reducing API response time by 35%.

**Technologies Used:** Laravel, RevenueCat, Webhooks, MySQL

### Where'sMyJob

Generates images on the basis of prompts

- Engineered a **production-workflow system** for print and apparel manufacturing firms to streamline sales, production, and delivery operations.
- Integrated **Stripe for payments** and **Firestore Cloud Messaging (FCM)** for real-time job status notifications.
- Implemented multi-role access for admins, managers, and staff, ensuring smooth coordination.

**Technologies Used:** Laravel, Stripe, Webhooks, FCM, Third-Party APIs, AWS

### HealthWealth

Doctor Patient Management Platform

- Built a comprehensive doctor-patient management system enabling **appointment booking, real-time chat, and video consultations.**
- Integrated **payment gateway** and **OpenAI API** for smart health assistance and data insights.
- Implemented **WebSocket-based communication** for instant notifications and chat updates.

**Technologies Used:** Laravel, WebSockets, Webhooks, Payment Gateway, OpenAI API, MySQL

### Artwork Platform:

Image Customization App

- Developed a **robust backend** in Core PHP for a platform offering vectorizing, embroidery digitizing, and color separation services.
- Integrated **third-party APIs** and **payment gateways** for seamless order processing.
- Enhanced authentication and file handling, ensuring data integrity and security.

**Technologies Used:** Core PHP, Payment Gateway, Webhooks, OpenAI API, MySQL
